New smoothing Algorithm!

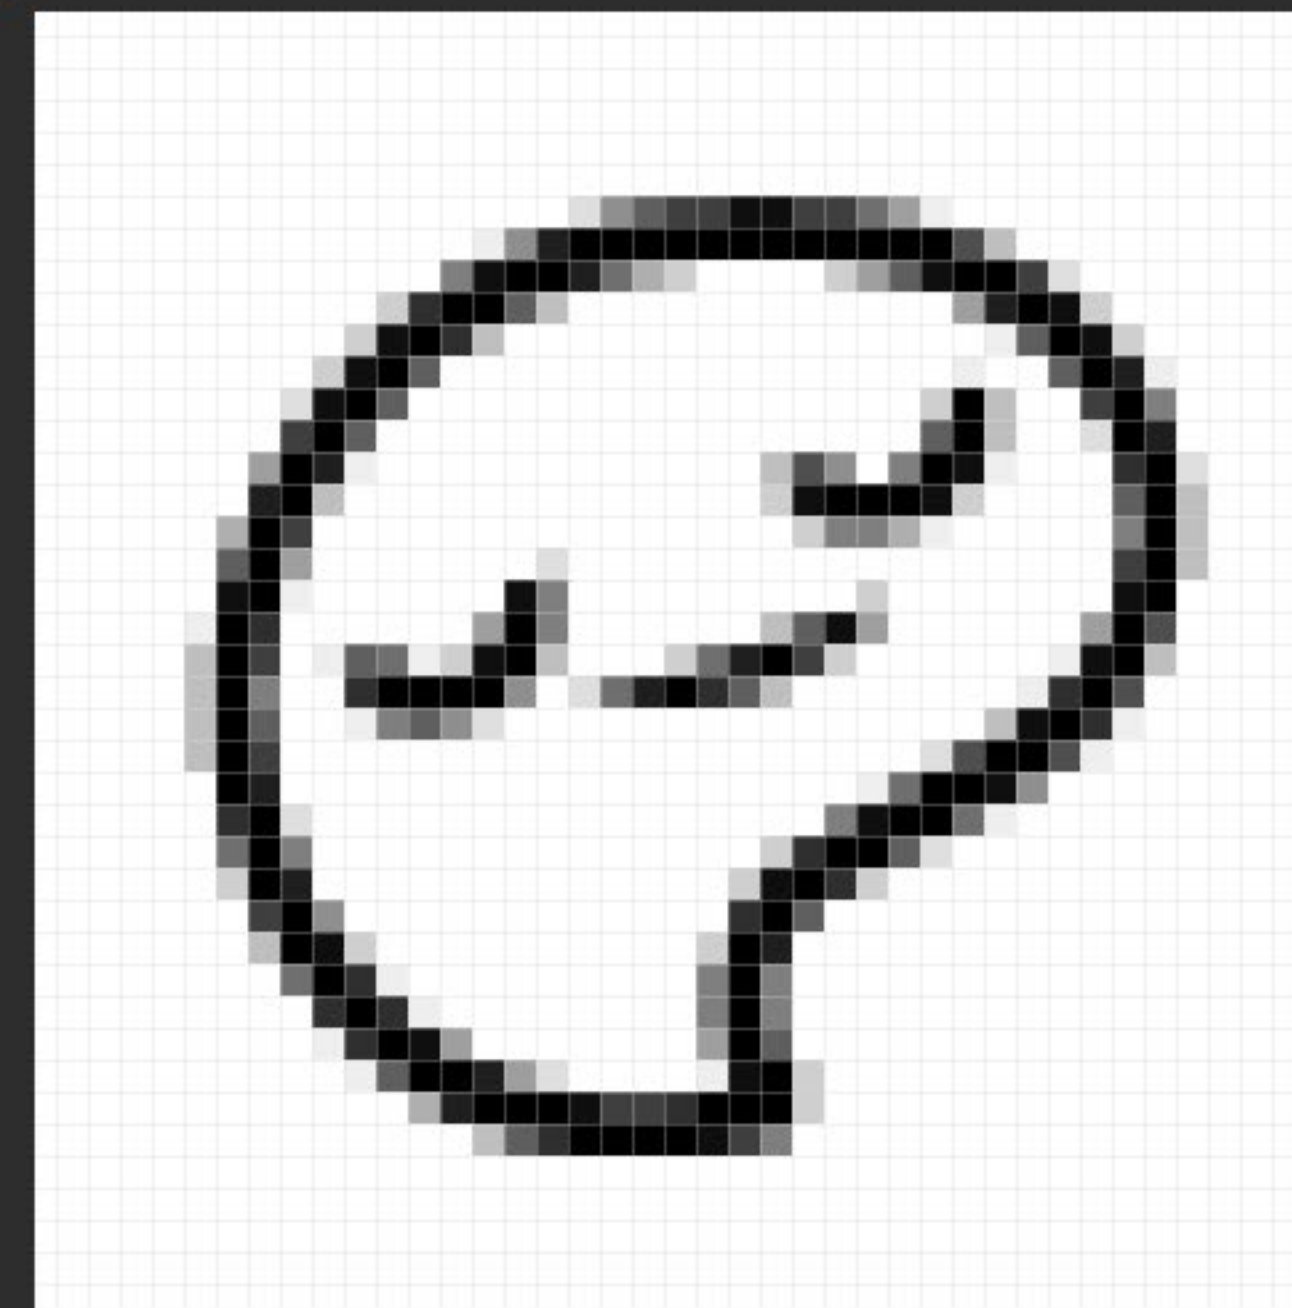

New smoothing Algorithm!

Click here or there to open the menu!

I'm Active!

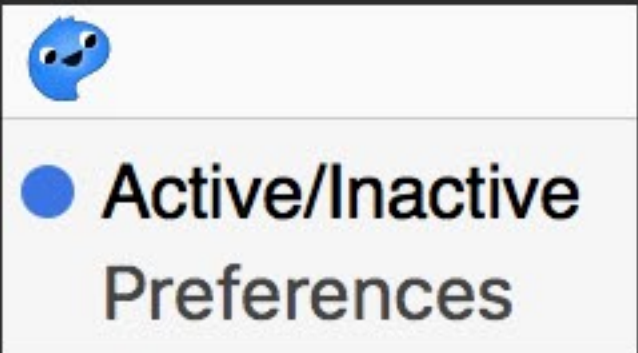

I'm Inactive!

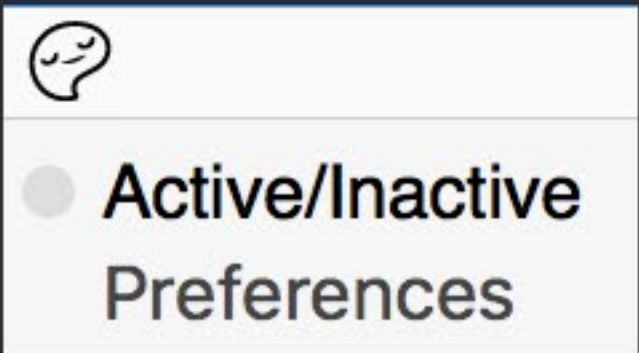

There are 2 activation states — ACTIVE and INACTIVE
Think of this as the main switch. None of the settings below apply, if it is set to INACTIVE. You can determine the state either by it's icon or the highlighted dot.

ACTIVE

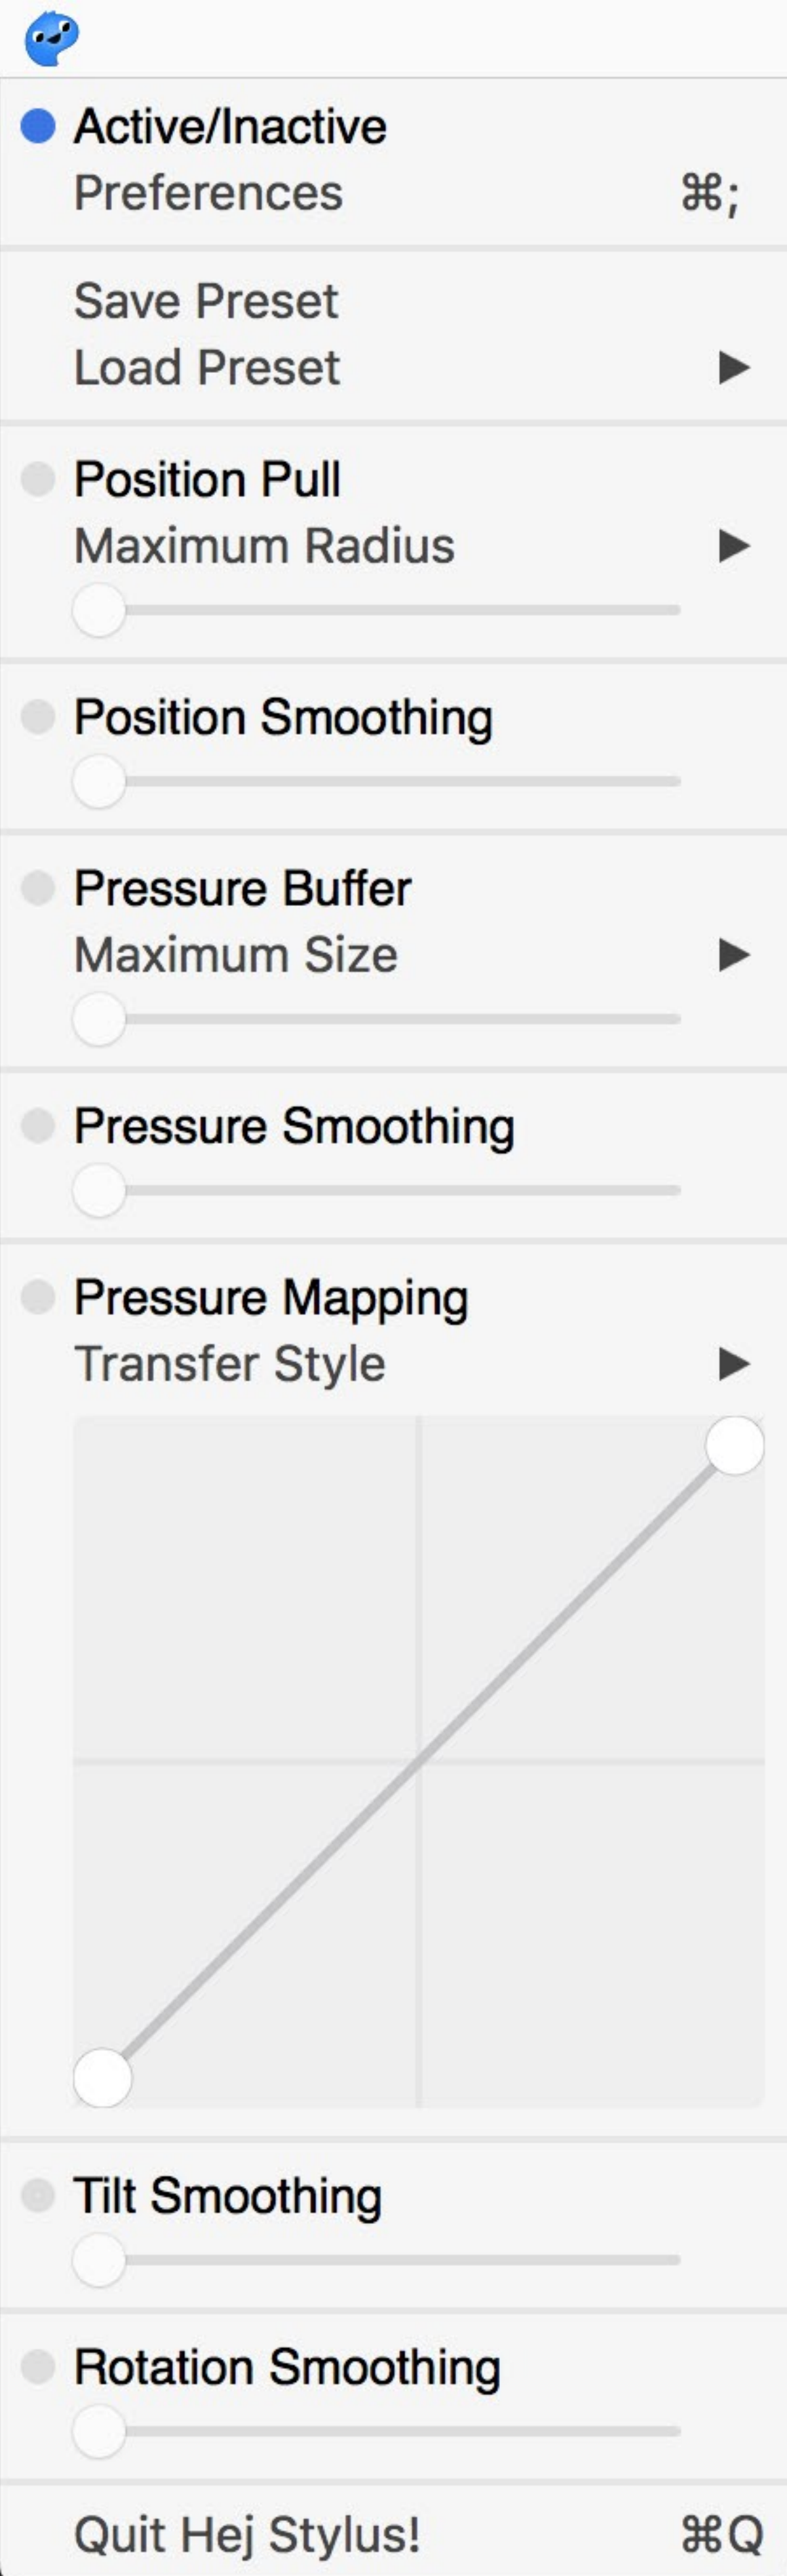

INACTIVE

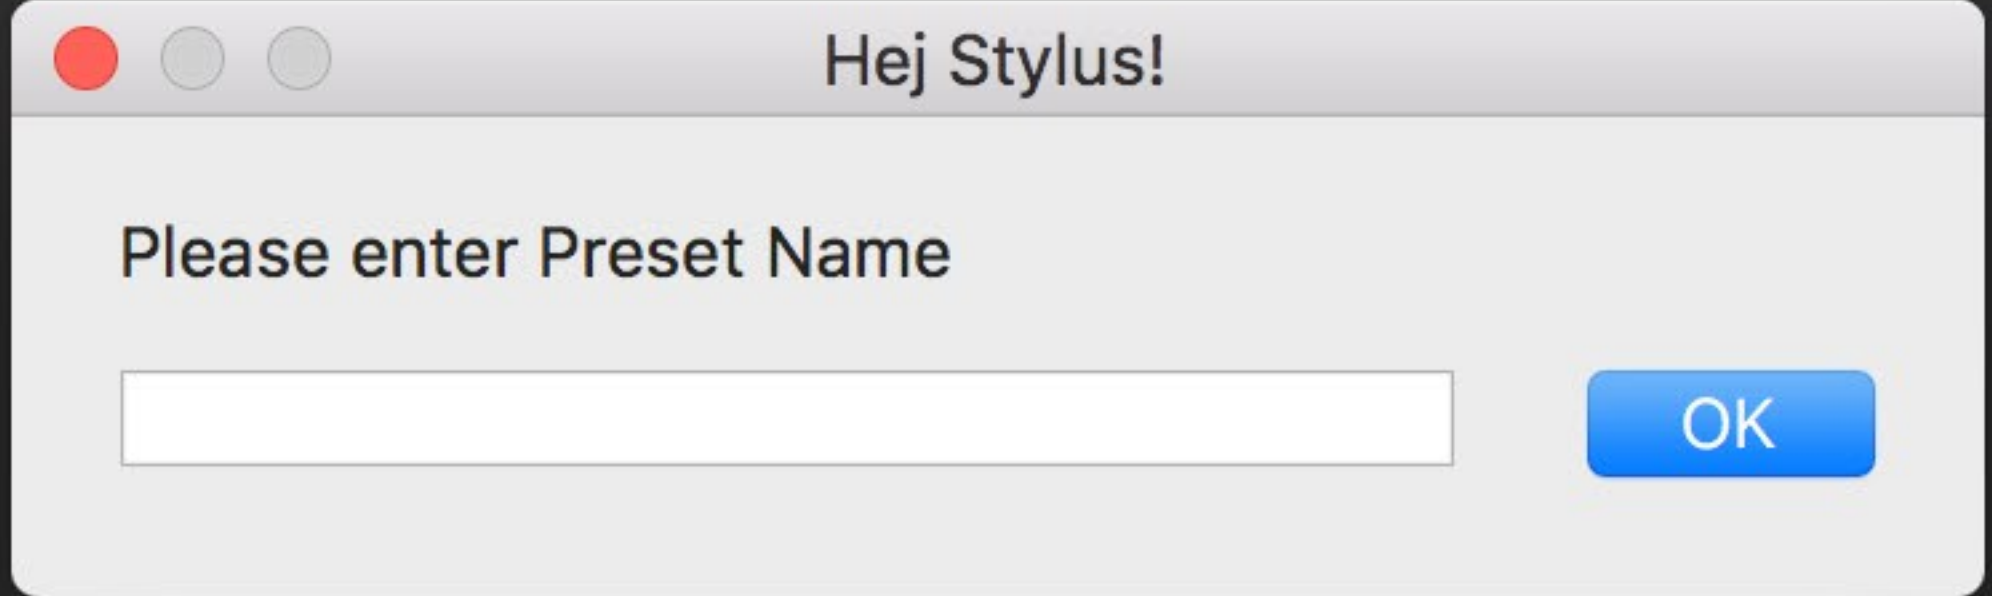

Activate the subsections by clicking the dot/name

Sliders and submenus are deactivated until the function is activated.

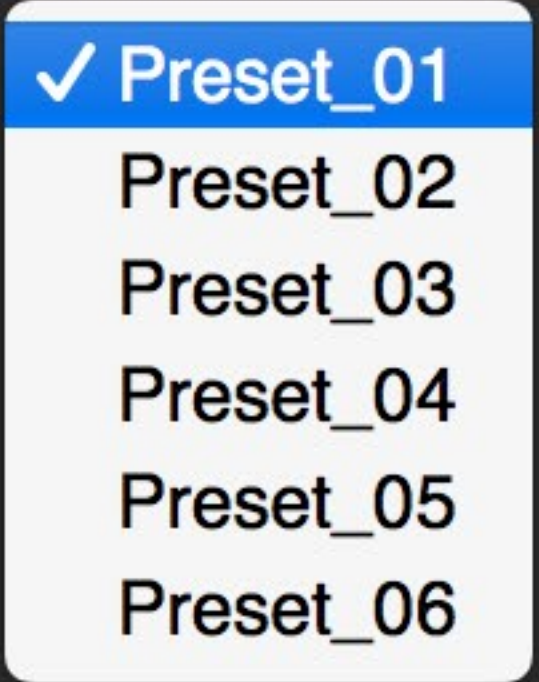

Storing and recalling Presets

When done playing with the fancy sliders hit save!

Now you can wormhole to your stored presets! Yess!

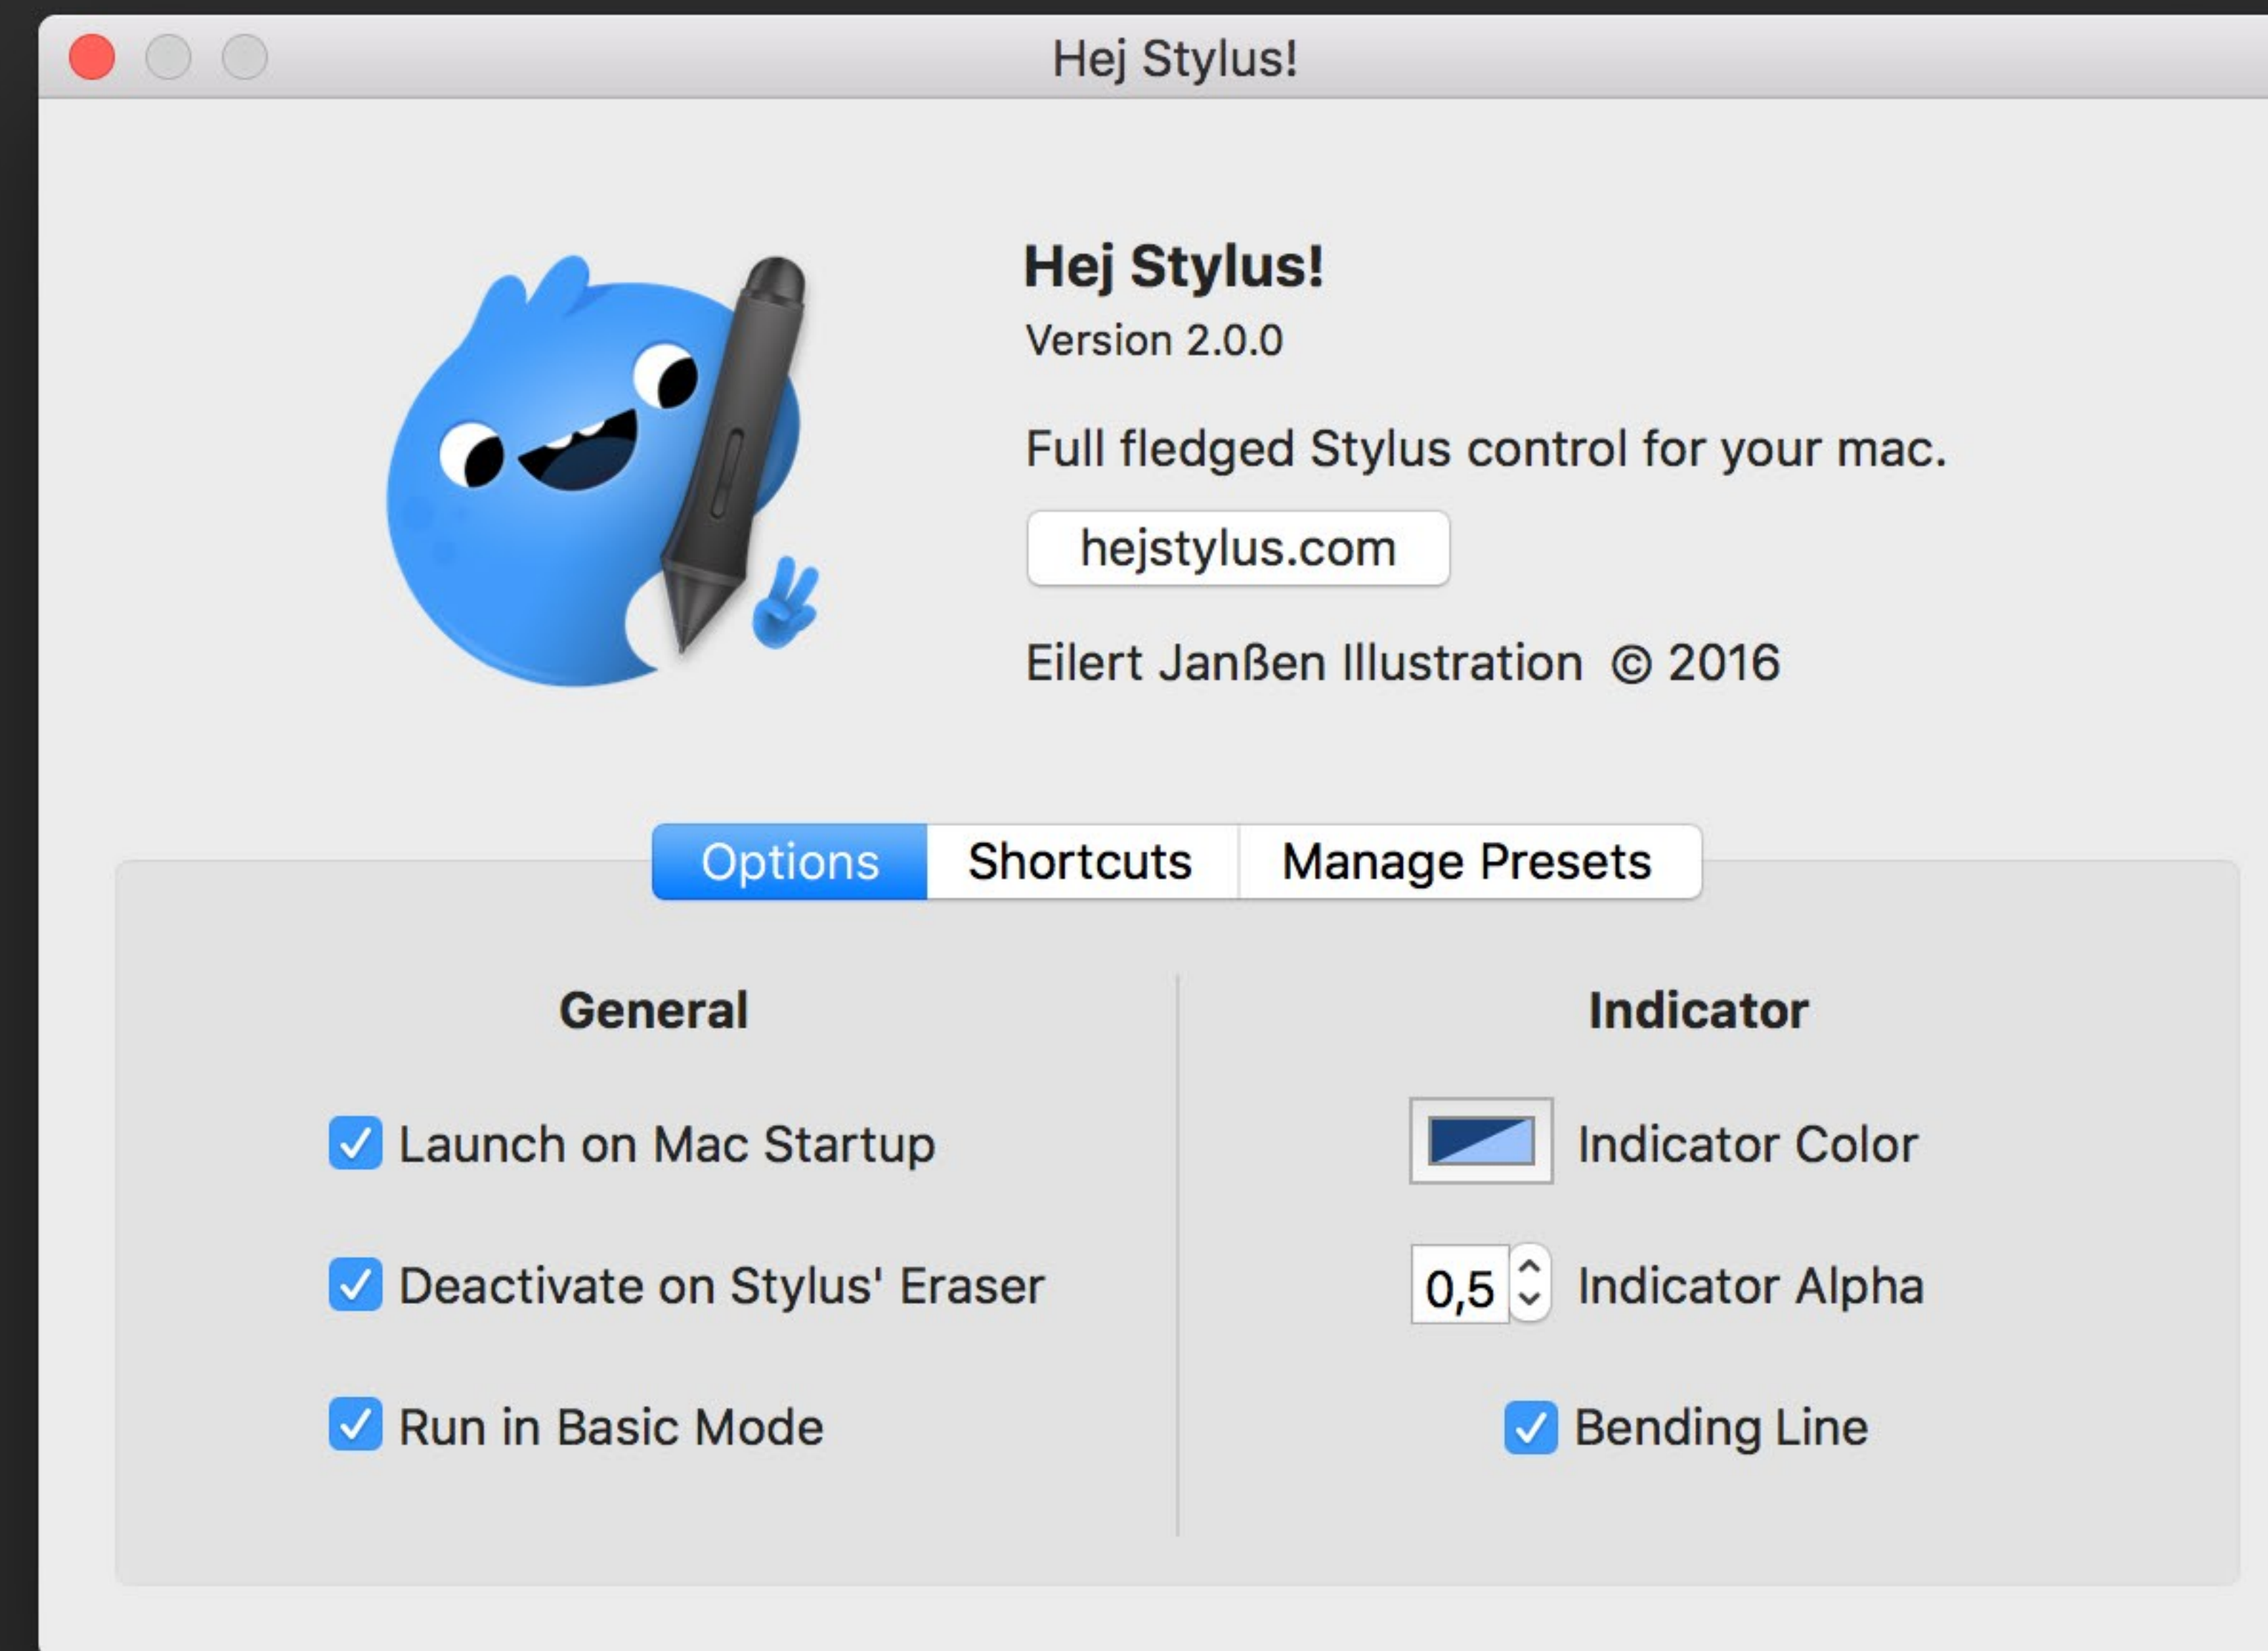

Options

Launch on Startup
For the lazy folks. :D

Deactivate on Eraser
...is pretty useful sometimes.

Basic (free) Mode

You're only seeing this when you entered no license at all.
To skip the annoying 'Enter License™' dialog check the box.
When you want to enter one just uncheck it and Hej Stylus! will ask for a license when starting the next time.

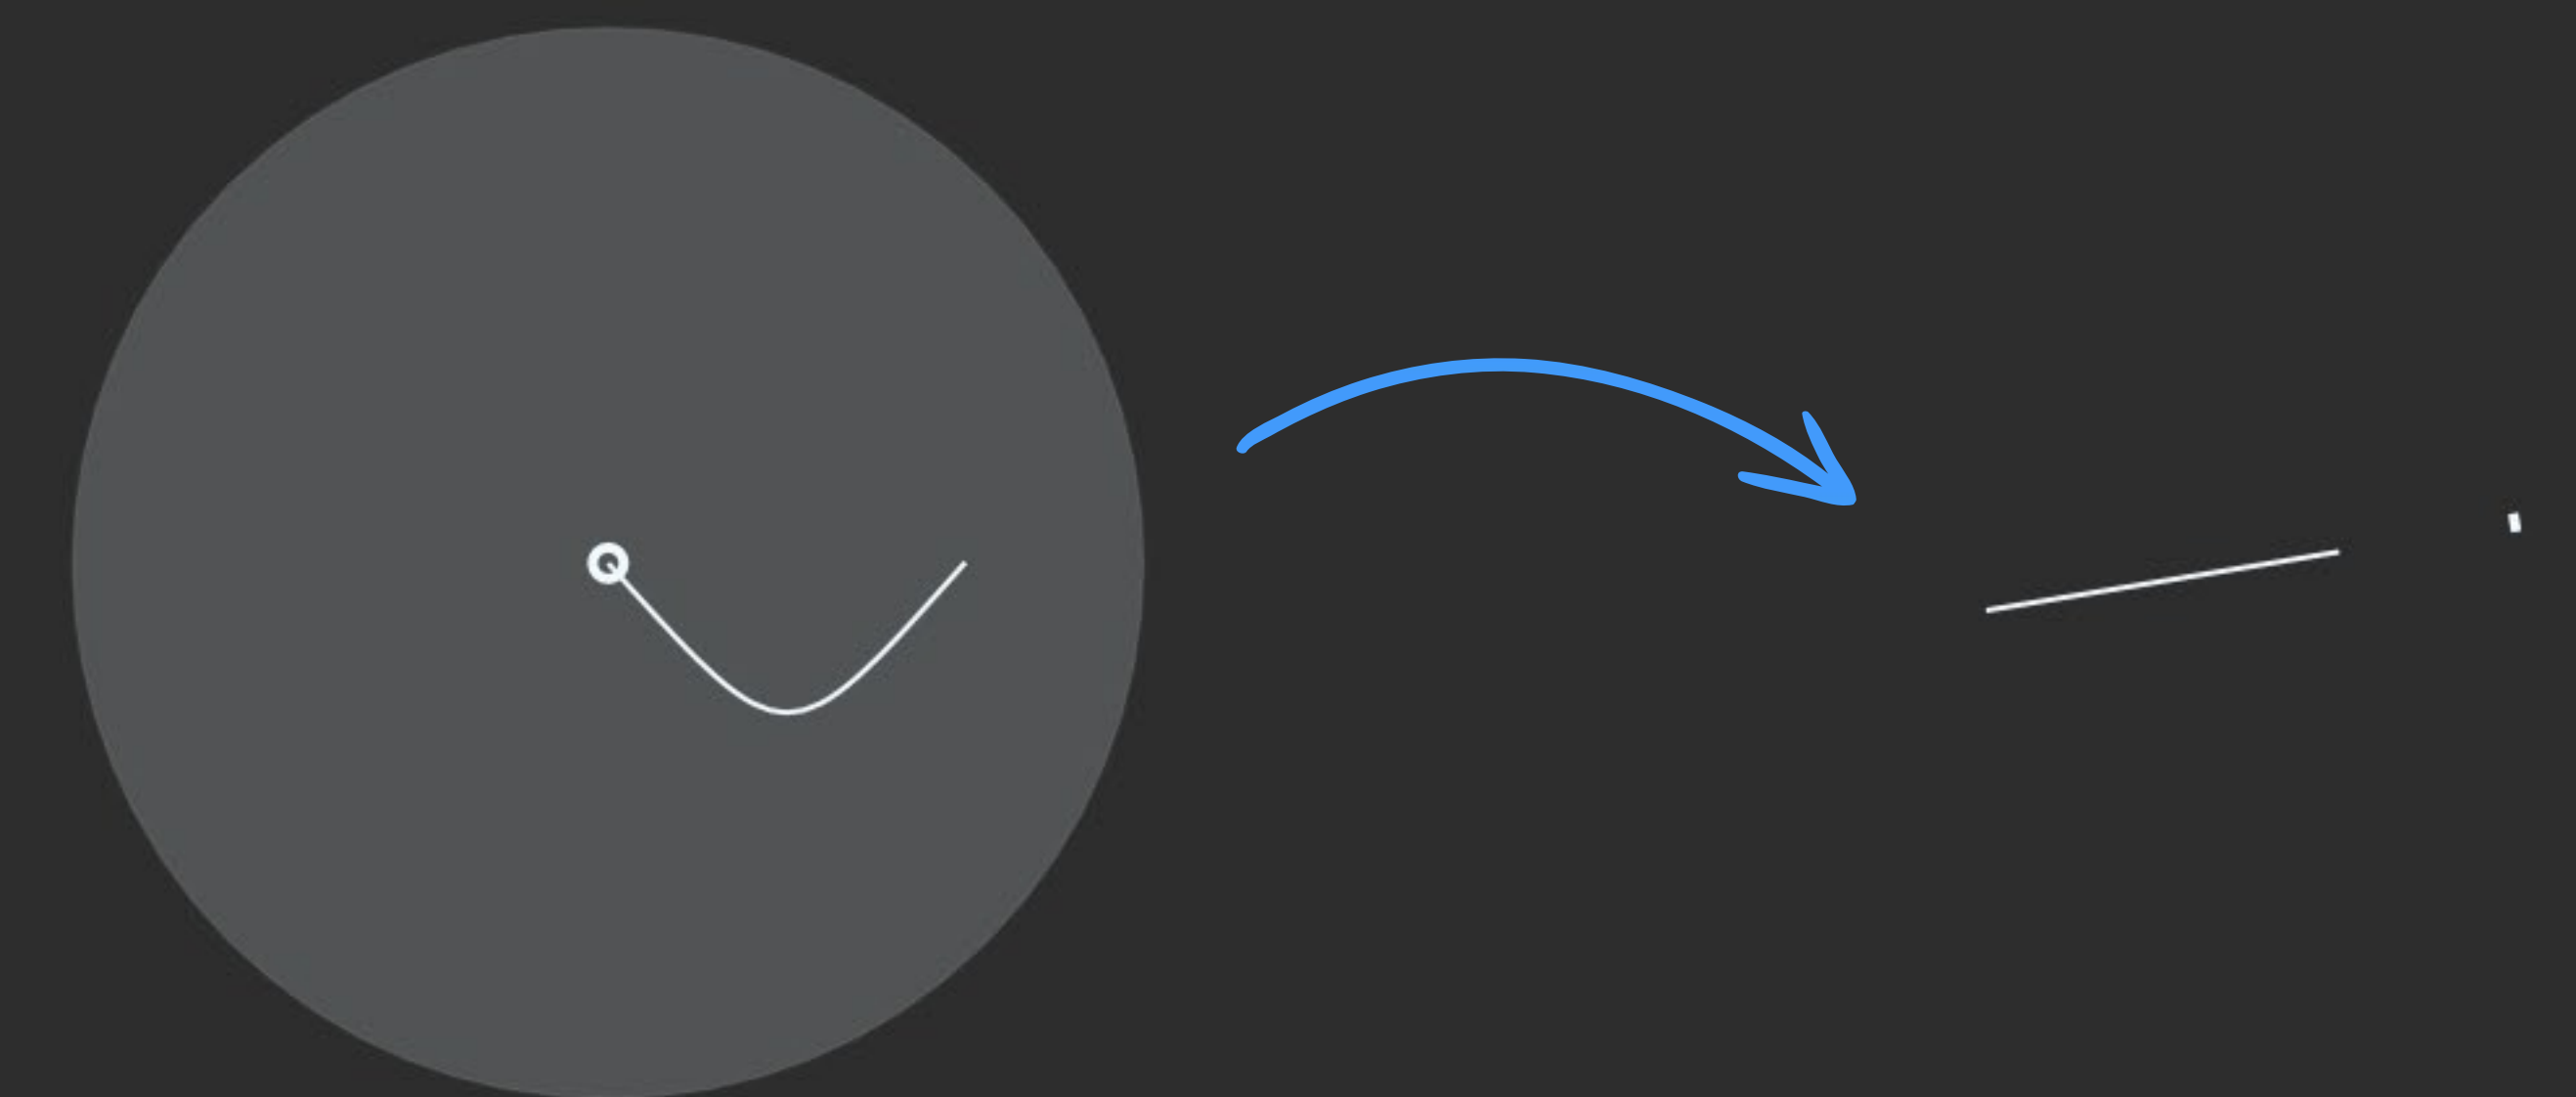

Indicator Color
Make your custom cursor color.

Indicator Alpha
Yes, alpha.

Bending Line
If you're distracted by
the bendy line make it a stick!

Shortcuts

Define Shortcuts

Press the 'Record Shortcut' button and make some fancy Shortcuts.

Pro Tip: Put toggle Hej Stylus! on/off on your stylus' button.

Increase/Decrease

Both (!) position sliders are hooked to this shortcut. It makes sense. Believe me.

Deactivate Checkbox

This is pretty neat: All shortcuts below the line are non_existent when Hej Stylus! is inactive.

Presets

Flick through your personal favs with the press of a button. An indication displays which preset is in charge. Nice!
